1. **PREAMBLE**

One of the government priorities in line with the Medium Term Strategic Framework and National Youth Development Strategy is to strengthen the skills and human resource base for all people who live in South Africa. However this cannot be an event, but will require that there is a coordinated and holistic response by all stakeholders involved in youth development programmes and activities. To this effect the South African government has developed a regulating policy framework.

This framework regulates and encourages youth of South Africa to access and enroll for programmes that will see them realising their goals. South African government interventions necessitate that government establish institutions that will reinforce youth training programmes. These Agricultural Tertiary Institutes (ATIs) contribute towards the development of our communities, particularly in agricultural related fields.

The Department of Agriculture, Forestry and Fisheries (DAFF) has therefore, realized the need to make an intervention around this subject area. The resolution was that, the ATIs should develop a policy that will regulate the Bursary allocations within these institutions, not loosing sight of government wide policies and other prescripts.

The principal aim of the bursary policy will be to provide financial support to competent and financially deserving students registered with the ATIs in the agricultural sector through quality, effective and accessible academic and practical agricultural education and training that is relevant to the needs of society and the market.
